

THE WEB MAVEN

UX/UI DESIGN SYSTEM & EXPERIENCE DOCUMENT

EXPERIENCE OBJECTIVE

The experience should communicate:

Trust before features.

Strategy before design.

Outcomes before technology.

The user should feel guided, never overwhelmed.

USER JOURNEYS

Journey A

Business Owner

Arrives

↓

Understands value proposition

↓

Reviews work

↓

Builds trust

↓

Submits inquiry

Journey B

Personal Brand

Arrives

Sees authority-focused messaging

Views case studies

Envisions own growth

Books discovery call

Journey C

Ecommerce Brand

Arrives

Recognizes sales challenges

Sees ecommerce expertise

Views relevant work

Starts project

GRID SYSTEM

Desktop

12 columns

Max width: 1440px

Content width: 1280px

Tablet

8 columns

Mobile

4 columns

SPACING SYSTEM

8px base unit

Scale:

8

16

24

32

48

64

96

128

192

Maintain consistency everywhere.

BORDER RADIUS

Small 8px

Medium 16px

Large 24px

Extra Large 32px

SHADOW SYSTEM

Subtle.

Never heavy.

Use depth carefully.

The website should feel premium, not skeuomorphic.

COMPONENT LIBRARY

Buttons

Primary

Solid blue background

High contrast

Hover lift animation

Magnetic effect

Secondary

Ghost style

Subtle hover transition

Cards

Services

Case studies

Testimonials

Metrics

Cards should feel tactile.

Hover states required.

Navigation

Sticky navigation

Transparent initially

Solid background on scroll

Smooth transitions

Theme toggle included

Forms

Minimal fields

Clear labels

Large touch targets

Accessible states

Inline validation

MOTION SYSTEM

Motion exists to guide attention.

Not decorate.

Global Motion Rules

Duration

200ms–800ms

Easing

Smooth and natural

No abrupt movement.

Hero Animations

Headline reveal

Word stagger

CTA fade

Background motion

Scroll Animations

Fade up

Reveal masks

Parallax imagery

Pinned storytelling sections

Progress indicators

Hover Animations

Buttons

Cards

Links

Navigation

Micro interactions only.

ACCESSIBILITY

WCAG AA

Keyboard support

Visible focus states

Reduced motion support

Semantic HTML

Proper color contrast

Alt text required

MOBILE EXPERIENCE

Mobile-first.

Not desktop shrunk down.

Priorities:

Fast loading

Easy navigation

Readable typography

Thumb-friendly interactions

Minimal friction

CASE STUDY DESIGN

Key Learnings

↓

CTA

Every case study should feel like evidence.

Not a portfolio item.

CONVERSION PRINCIPLES

Every page must answer:

Who are you?

What do you do?

Why should I trust you?

Why does it matter?

What should I do next?

Every major section should contain a clear next step.

SUCCESS METRICS

A successful website should:

Increase inquiry submissions.

Increase discovery calls.

Improve perceived authority.

Increase time on site.

Generate qualified leads.

Strengthen brand perception.

Everything in the UI should support these outcomes.
