

THE WEB MAVEN

Brand Identity Guide

Lagos, Nigeria · Faith Akinboyejo

Brand Positioning

The Web Maven is a premium, solo-operated web design consultancy founded by Faith Akinboyejo in Lagos, Nigeria. We build strategic digital infrastructure — websites, funnels, and e-commerce systems — for ambitious Nigerian SME founders in beauty, food, events, fashion, and professional services.

We are not a cheap commodity agency. Every project is handled personally — no junior handoffs. We work WhatsApp-first and stay outcome-focused at all times.

Tagline: "Your website should work as hard as you do."

Voice Adjectives

- Confident — direct, authoritative, never apologetic
- Polished — premium finish in every touchpoint
- Strategic — outcome-led, not feature-led
- Modern — contemporary Lagos excellence
- Personal — one founder, full accountability

Logo System

Primary logo — dark background

Icon mark / favicon

Logo Rules

- Always use on #0f0f0f dark or white (#FFFFFF) backgrounds only
- Minimum clear space: equal to the height of the W mark on all sides
- Never stretch, rotate, recolor, or add effects to the mark
- Icon mark may be used solo only at sizes below 120px width
- Never place the logo on busy photographic backgrounds

Color Palette

Role	Name	Hex	Usage
Primary	Deep Black	#0f0f0f	Background, logo field, dominant surface
Accent	Warm Gold	#C9A84C	Logo mark, headlines, dividers, CTAs, emphasis
Text Primary	Pure White	#FFFFFF	Headlines, wordmark, all primary copy on dark bg
Text Secondary	Light Grey	#CCCCCC	Body copy, supporting text on dark backgrounds
Muted	Dark Grey	#333333	Cards, section dividers, subtle surfaces
Light BG	Off White	#F7F5F0	Alternate light-mode backgrounds, print collateral

Typography System

Display / Headings

Playfair Display

Bold · Semibold · Regular

Use for: hero headlines, section titles, brand statements, pull quotes. Authority and editorial weight.

Body / UI

Inter or DM Sans

Regular · Medium · SemiBold

Use for: all body copy, navigation, buttons, captions, metadata. Clean, modern, highly legible at small sizes.

Accent / Labels

LETTER GOTHIC STD

All caps · wide tracking

Use for: labels, tags, section overlines, small callouts. Spaced all-caps creates premium tension.

Type Scale

Level	Size	Weight
Hero H1	56–72px	Bold
H2	36–44px	SemiBold
H3	24–28px	Medium
Body	15–17px	Regular
Caption	12–13px	Regular
Label	10–11px	All Caps

Do's & Don'ts

DO

- Use the primary logo on #0f0f0f or pure white only
- Lead with outcomes in copy ("more leads", "more revenue")
- Use Playfair Display for all hero statements
- Keep compositions clean — generous negative space
- Use warm gold sparingly as a true accent, not a fill color
- Maintain consistent spaced-caps for all label text
- Reference the WhatsApp-first workflow as a differentiator

DON'T

- Never use neon, loud gradients, or clashing colors
- Never stretch, rotate, or recolor the logo mark
- Don't use casual language — "cheap", "affordable", "quick"
- Never place logo on noisy photography without a dark scrim
- Don't use more than two typefaces in a single composition
- Avoid stock-photo clichés (handshakes, laptops in cafes)
- Never use the brand colors in a way that reads as generic tech
